PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN stack with experience in building AI-driven and secure web applications using React, Node.js, MongoDB, and RESTful APIs. Experienced in integrating LLM APIs and deploying scalable applications on cloud platforms.

EXPERIENCE

AI Virtual Intern – Infosys Springboard

Nov 2025 – Jan 2026

- Developed modules for an AI-driven content verification system processing 1000+ data samples for misinformation detection
- Executed data preprocessing workflows improving classification accuracy by ~15–20% (estimated)
- Applied SDLC practices including testing, debugging, and modular development reducing issue resolution time by ~25%
- Collaborated in a virtual development environment following documentation and version control best practices

UI/UX Design Intern – Technogrowth Software Solutions

Jun 2025 – Jul 2025

- Designed responsive UI layouts supporting multiple device types (mobile, tablet, desktop)
- Optimized user workflows reducing navigation complexity and improving interaction efficiency
- Coordinated with developers to improve UI consistency across 5+ interface components
- Utilized design principles including hierarchy and responsiveness to enhance usability

PROJECTS

SpeakFluently – AI Communication Platform | [GitHub](#) | [Live Demo](#)

Technologies: MERN Stack, Socket.io, WebRTC, JWT, MongoDB, OpenAI API, Google Gemini, Render, Vercel

- Architected real-time peer matching system handling multiple concurrent users using Socket.io and WebRTC
- Integrated LLM APIs for real-time feedback and scoring, architected full stack systems with RESTful APIs, cloud deployment
- Implemented JWT authentication and MongoDB progress tracking with streak and level system

TruthGuard – AI Fake Information Detection System | [GitHub](#) | [Live Demo](#)

Technologies: Python, Flask, NLP, Transformers, SQL, REST APIs, JavaScript, REST API Development

- Built NLP-based classification system processing 1000+ text records using transformer models
- Developed text preprocessing pipeline improving semantic analysis and prediction accuracy
- Integrated fact-verification APIs for automated credibility analysis and misinformation detection

SecureAuth – Authentication & Security Management System | [GitHub](#) | [Live Demo](#)

Technologies: MERN Stack, JWT, MongoDB, Express.js, RESTful API Development, Render

- Constructed secure JWT authentication with role-based access control (RBAC)
- Developed admin dashboard for user lifecycle and account management
- Created reusable authentication module for MERN applications

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), Python, SQL
- Full Stack Development:** React.js, HTML5, CSS3, Tailwind CSS, Node.js, Express.js, RESTful API Development, JWT Authentication, Backend Development
- Database & AI:** MongoDB, SQL, NLP Basics, LLM API Integration (OpenAI, Gemini), Prompt Engineering
- Tools & Deployment:** Git, GitHub, Netlify, Vercel, Render, MongoDB Atlas, GCP, Cloud Deployment
- Soft Skills:** Problem Solving, Communication, Team Collaboration, Analytical Thinking

EDUCATION

Bachelor of Computer Applications (BCA)

2023 - 2026

Smt. Maherbanu College | CGPA: 8.25 | Akola, India

CERTIFICATIONS

- AI Virtual Internship** – Infosys Springboard | Jan 2026
- Full Stack Web Development** – GeeksforGeeks | Feb 2026
